

## UNSW Main Library Level 2 refurbishment

This refurbishment on Level 2 of UNSW Main Library took lahznimmo's involvement with the Main Library past 15 years.

The project involved converting existing staff office space into a series of student study, multimedia, dining and lounge areas. To accommodate this mixed-use and the sheer number of students, acoustic considerations were paramount.

The existing suspended tile ceiling was removed and replaced with a two layer acoustic ceiling system of slab mounted acoustic panels, and an array of suspended acoustic discs made from recyclable polyester fibre panels. Ceiling services were exposed and run between these two layers.

Multimedia pods, wrap-around study carrels and zoned floor finishes help delineate the spaces within the open floor plan.

The success of the project has been demonstrated by the almost immediate occupation of the area by students.

Client: University of New South Wales  
 Country: Eora Nation  
 Location: Kensington, NSW  
 Project Value: \$2.0 Mil  
 Completed: 2018
